FOR IMMEDIATE RELEASE

S.G.W.U. COMPUTER CENTRE TO RUN MANAGEMENT SEMINAR OCT. 18-19

Management will return to university for a two-day course in Critical Path Method (CPM) and Program Evaluation and Review Technique (PERT) October 18th and 19th.

The seminar, presented jointly by the Computer Centre of Sir George Williams University and W. Somerville & Associates Management Ltd., will be held in SGWU's Hall Building, Maisonneuve Boulevard and Bishop Street, from 9:00 a.m. to 4:00 p.m.

CPM and PERT were originally developed in the USA in 1957 to handle NASA projects; Expo was planned from start to completion using these techniques.

The course will teach the techniques and demonstrate the practical applications of these methods (lower overall costs, overall project coordination) in industry. A workshop will be held to fully illustrate the use of a powerful computer (Sir George's Control Data Corporation 3000) in efficiently controlling industry. This workshop will be extended for a period of two weeks to enable students to develop their own CPM/PERT networks with the assistance of SGWU staff and facilities.

From the office of: Malcolm Stone,
Information Officer.

NOTE: You are invited to cover these sessions. For further information please contact Prof. Graham Martin, Director of the SGWU Computer Centre, at 879-5925.
